Hello,

I'm writing to let you know that Moss has moved into a new global headquarters and U.S.A. production facility in Franklin Park, Illinois. The consolidation of our three U.S. plants is the culmination of a two-year effort by Moss and we are very proud of the results.

I realize it's odd, this message arrives in the middle of the most difficult business environment in my 40 years in the industry. I sincerely hope that you, your family, and your entire organization are healthy and safe and our collective business returns quickly and safely.

When it does, you will find Moss ready to be an even better partner with you in this new normal. Our new facility will enable us to increase speed, improve quality, and collaborate faster on your solutions at lower costs. All of Moss's experts and core capabilities are now together under one huge roof: 180,000+ sqft of state-of-the-art materials, technology and technique.

While we stand on the experience of more than four decades delivering brand experiences, Moss is also ready to support you to execute COVID-19 safety, separation, sanitization, and signage solutions. Perhaps our most unique development is our newly added medical division. Our 24-hour, high-speed face mask production lines are producing millions of 3-ply disposable face masks for customers across the country.

Know that the people of Moss are an extension of your team – knowledgeable, consultative and quick to respond. We're committed and ready to move forward with efficiency, sustainability and manufacturing diversity. And we do so with gratitude for every opportunity to perform outstanding work with and for you.

We are ready and look forward to hearing how we can help you. Here are a few facts about Moss Global Headquarters:
